Experience

Jovian.ml

Deep Learning with PyTorch: Zero to GANs
May 2020 - July 2020 (3 months)

Learnt different concepts of Deep Learning using PyTorch from this course by jovian.ml in collaboration with freeCodeCamp.org. There was a Kaggle competition at the end of this course, where I needed to predict protein organelle localization labels for each sample. This is a multi-label image classification problem, where each image can belong to several classes. I ended up at 122nd position (top 14%) in this Kaggle competition.

Consulting and Analytics Club, IIT Guwahati
Summer Analytics 2020

April 2020 - June 2020 (3 months)

Successfully acquired different Machine Learning skills through Python from this primer course on Data Science. I finished with rank 7 out of 4770 participants. There was an enjoyable Capstone Kaggle Project as an end of this course. The aim was to predict employee attrition by the given data about his/her past history. I secured 46th rank (top 6%) in this hackathon.

Education

Presidency University, Kolkata, India
M. Sc. , Statistics · (2019 - 2021)

Maulana Azad College, University of Calcutta
B. Sc. (Hons.), Statistics · (2015 - 2019)
