School

1st position in the Quiz in the Inter-
Adventist School competition

Dharmendra Yadav

UI/UX and Graphic Designer
Bengaluru

Summary

Looking for a stunning design that not only looks good, but is also
incredibly intuitive? Look no further! I specialise in creating UI that is:

Beautiful
Intuitive
Easy to navigate
Delights your users
Skyrockets conversion rates

If you're looking for any of the following, I can help you with:

Mobile App Design (Android & iOS)
Tablet Design
Desktop Design
Apple Watch Design
Logo Design

Over the years I have refined my design process -- I will incorporate
and work on all of these aspects of UI/UX:

Competitor research & market research
User personas
User/task flows
Wireframing
Mockups
Illustration & graphics
Prototyping

I can work on your project from scratch, or pick it up from any point
(whether you just have a vague idea of your perfect product, a few
Sketch files, or are looking for a redesign!).

The main tools I use (but I can pick up and use whatever you like!):

Sketch
Photoshop
Adobe XD
Figma
Illustrator
Invision
Marvel

I also come from a developer background and am familiar with these programming languages. This background helps me realise what is possible with code and makes my designs more intuitive. I can also communicate well with your developers:

HTML/CSS
Javascript/React

I'm super friendly and work fast, sending frequent updates!
